Rubric for Communication Responses

TIK 2O, ICS 3M, ICS 4M

A communication response should follow proper English structure. That is, your response should have a thesis, supporting points and a conclusion. Proper spelling and grammar is expected.

Since communication can come in many forms, this rubric is intended for the case where a written response is required. Illustrations may be used to supplement the written response. In this case, the quality of the illustration and how well it is used to support your written argument will be evaluated.

	L4	L3	L2	L1
Communication	• Communication is clear, precise and confident. • Explanations are complete and appropriate with evidence in a variety of contexts. • Computer science terminology is employed correctly and in a variety of contexts. • Excellent spelling, grammar and construction of response. • Response is supplemented with an appropriate diagram, if applicable.	• Communication displays good clarity and precision. • Explanations are complete and appropriate. • Computer science terminology is employed correctly but in limited context. • Good spelling, grammar and construction of response. • Response may be supplemented with a diagram that is somewhat appropriate.	• Communication has some clarity and some precision. • Explanations are appropriate but incomplete. • Some computer science terminology is employed. • Adequate spelling, grammar and construction of response. • Response may be supplemented with an inappropriate diagram.	• Communication is unclear or imprecise. • Explanations are partially complete or inappropriate. • Computer science terminology may be employed in a limited sense, not necessarily correctly or in context. • Poor spelling, grammar and construction of response. • No diagram is used to supplement response.
